

# NZM 4, 6, 9, 12 Molded Case Circuit Breakers and Switches Tripping Characteristics

## Tripping characteristics

The tripping characteristics show the tripping time of the breakers in relation to the reponse current. The mean values of the tolerance bands are indicated at an ambient temperature of 20°C, starting from cold. The tripping time of overload trips at operational temperature reduces to approximately 1/4 of that shown.

Circuit Breakers,  
Disconnect Switches, Molded Case Switches

# NZMH 4, 6, 9 Molded Case Circuit Breakers and Switches Let-through Characteristics

Let-through current  $I_D$

Let-through energy  $I^2t$
