

# NZM7 Molded Case Circuit Breakers and Switches

## Tripping Characteristics, Let-through Characteristics

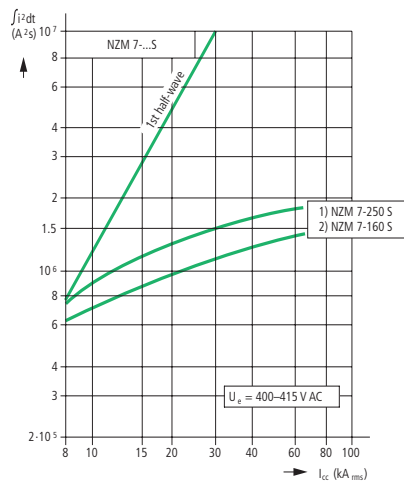

### Tripping characteristics, system protection

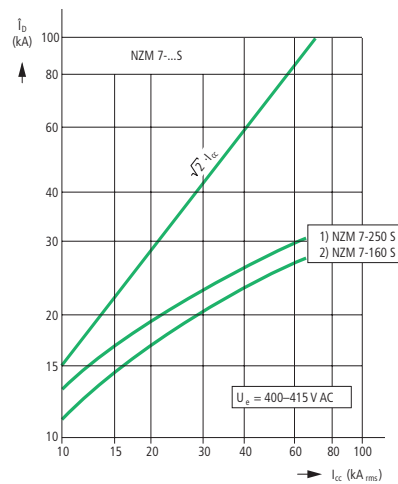

The tripping characteristics show the tripping time of the breakers in relation to the response current

They show mean values of the tolerance band at an ambient temperature of 20°C, starting from cold.

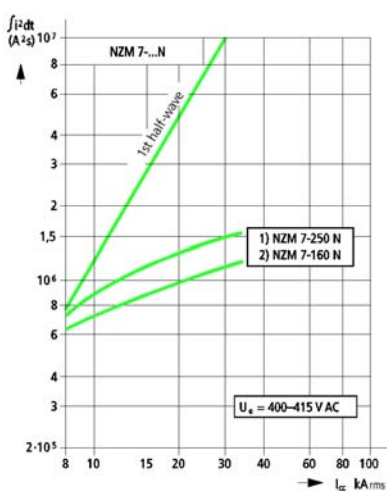

### Let-through energy I<sup>2</sup>t

### Let-through current I<sub>D</sub>

### Let-through energy I<sup>2</sup>t

### Let-through current I<sub>D</sub>
